

Sprintex Treadmills

Aretech now offers medical grade Sprintex slat-belt treadmills as accessories to the ZeroG Gait and Balance System. The frictionless, shock-absorbing rubber slats of Sprintex treadmills provide a quiet, comfortable surface designed for long-term durability. The treadmill controls are integrated into the ZeroG software to seamlessly control both ZeroG and the treadmill. With DualArrest, if the patient were to fall, ZeroG will prevent the fall and simultaneously stop the treadmill.

Two Models
